# SUSTAINABILITY

Sustainability is an integrated part of the way Bestway operates. Installing a 3.0 Megawatts Solar Photovoltaic System on the rooftops of Jiangsu Funing manufacturing facility in 2009, and a 2.1 Megawatts Solar Photovoltaic System on the rooftops of Jiangsu Nantong manufacturing facility in 2011, we have covered over 1 million square feet of usable rooftop area and generate carbon-neutral electricity, reducing the amount of fossil fuel we need to buy and consume.

As a responsible business, our duty is to manage our energy consumption by becoming more energy efficient in our manufacturing operations and pursuing ever greener sustainability initiatives, targeting a 25% reduction in emissions by 2020 with additional Solar Photovoltaic System installed at our other manufacturing facilities.

In our respect for sustainability, Bestway after-sales service diminishes environmental impact by supplying spare parts and repairs to reduce waste and extend the life of each product bought under the Bestway brand.
