ABOUT KALAS SPORTSWEAR

KALAS Sportswear является крупнейшим производителем и дистрибьютором велосипедной одежды не только в Чехии но в средней и северной Европе. Кроме велосипедной одежды изготавливаем также с индивидуальным дизайном на триатлон, ориентирование, легкая атлетика, хоккей, футбол и другие виды спорта.

Одевает тех наилучших

Джерси с логотипом KALAS одевают чемпионы мира и олимпийских игр, члены национальных команд, множество профессиональных команд и тысячи любителей велоспорта в более чем 20 странах мира. Производство велоформы на заказ пользуется все большей популярностью и самыми известными нашими клиентами являются Škoda Auto, ČEZ, Budějovický Budvar, Bosch, Hypoteční banka, ČSOB, Subaru ČR или Hewlett Packard.

Технология & ноу-хау

Мы единственные в Чехии, кто кроит материалы на специальном катре. Печать дизайна производится на плоттере японской фирмы Mimaki i с использованием итальянских красок на швейцарскую сублимационную бумагу. При переносе напечатанного дизайна с бумаги на материал используется сублимационные итальянские станки Monti Antonio. Но даже самая наилучшая технология не может сравниться с золотыми руками наших швей, которые шьют одежду KALAS на нашей фабрике в городе Табор.

Мы всем сердцем за велоспорт

Хотя на KALAS Sportswear сегодня работает более 200 человек, все равно мы считаемся семейной фирмой и за все отвечаем своим именем. Безкомпромиссно придерживаемся качества продукции, велоформу шьем в Чехии из функциональных материалов с Италии и Швейцарии с использованием современной технологии.

MATERIALS AND PADS

Lycra

The Lycra fabrics offer stretch and recovery power designed to help any cyclist to move and perform at their best, while feeling comfortable. This textile material is a perfect combination of light-weight, breathability, close-fit, shape retention and freedom of movement.

Lycra Speed

Very soft fabric Lycra Speed is characterized by its great elasticity, which provides maximal aerodynamics to cycling clothes designed for Time Trials..

RainMem X3

The RainMem fabrics is fully printable cyclewear membrane that is wind and water-resistant as well as highly breathable. Technical parameters of the fabrics are: breathability: 11 000 g / m² / 24 hrs, water column: 10 000 mm.

W&W Bridge

Roubaix

Revolutionary stretchy material containing LYCRA fibers developed for high quality sportswear with UV protection, while keeping your body dry and warm. This fabric has a special antibacterial treatment.

Athena Plus

W&W Winter Karo

Excellent wind and waterproof membrane fabric. Upper part from polyester knit with insulating fleece on the inner side. Ideal for cold weather. Specifications: Water column: 10.000 mm Breathability: 11.000g/sq.m/24 hours

Devan

Weft-knitted polyester material with two-layer structure made from lightweight fabrics developed for functional cycle-wear.
